

CONTROL: YOU SET YOUR RATE

Securely™ provides you with tools previously available only to payment companies, giving you control of the payment experience and relationship with your customers.

Securely's FareShare® technology allows processing costs to be set by the business and shared with customers when and if desired

Digital Cash™ discounts available on device or at the counter providing customers with choice and savings on each transaction

Our patent-pending technology moves money with security and speed depositing amounts equal to the invoice, eliminating deposit reconciliation errors

Pricing flexibility available across all payment forms lets you share transactional cost transparency with your customers
